

Name: Karunya M A

Roll no: 22ISR016

Task 1

Create a simple FreeStyle Job To Install Nginx on the server

Jenkins

Jenkins is a tool that is used for automation. It is mainly an open-source server that allows all the developers to build, test and deploy software. It is written in Java and runs on java only. By using Jenkins we can make a continuous integration of projects(jobs) or end-to-endpoint automation

Steps to create simple freestyle job to install nginx

1. Click on "New Item" from the Jenkins dashboard.
2. Enter a job name (e.g., Install-Nginx).
3. Select "**Freestyle project**" and click **OK**.
4. **Set Up the Build Environment**
 - Scroll down to the "**Build**" section.
 - Click "**Add build step**" → Select "**Execute shell**".
5. **Save and Build**
 - Click "**Save**" to apply the configurations.
 - Click "**Build Now**" to start the installation process.
6. Open "**Console Output**" to check logs.
